THINK FUTURE

We care about every journey you take, not just the present, but also the long-term future.
The i-DM Super Hybrid technology, designed with a philosophy of sustainability,
keeps our planet vibrant and full of life for generations to come.

Eco-friendly Efficient Intelligent Safe

RUGGED and EXQUISITE

Originating from the design style of T2, it embodies a boxy and resolute aesthetic concept. With minimalist lines shaping a rugged character, it expresses a deep respect for nature.

Outstanding engines and hybrid systems, both explosiveness and endurance. Smoother ride, stronger acceleration, more economical fuel consumption and better quietness

High Energy Efficiency High Performance High Safety High Intelligence

1.5TD Kunpeng Gold Hybrid Powertrain

Combined range of 1300 km, pure electric range of 206 km
Fuel consumption as low as 6.78L/100km in charge-sustaining mode

3DHT Dedicated Hybrid Transmission

Sharp acceleration at low speeds, stable performance at medium speeds, high efficiency on highways

Tri-Motor True AWD with Differential Lock

Delivers up to 7700 N·m of wheel-end torque for superior power
Features a standard electronically controlled jaw clutch for fast and reliable engagement

43.24 kWh High-Capacity Battery

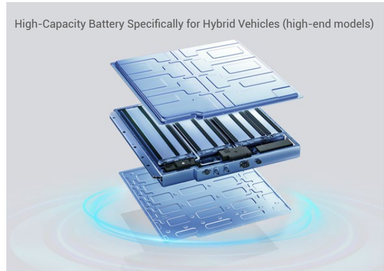

Large energy storage with a battery capacity of 43.24 kWh

High possibility in all road conditions

Approach angle 28°, departure angle 30°, minimum ground clearance 220mm, wading depth 700mm. Be able to climb mountains and enter water and rivers, you can drive on whatever the road conditions

The Fifth Generation 1.5 TGDI High-efficiency hybrid-specific engine

High-Capacity Battery Specifically for Hybrid Vehicles (high-end models)

Three-Speed Super Hybrid Transmission

XWD Fully Automatic Intelligent AWD

The sixth-generation BorgWarner torque management system ensures peace of mind while driving. It automatically switches between four-wheel drive modes and intelligently distributes power for optimal traction. Additionally, the rear wheel torque is automatically allocated, allowing for seamless recovery without the need to stop and switch modes.

Super hybrid technology i-DM

CRAWL MODE

The WCBS braking system seamlessly integrates torque request, torque reduction, and braking force, working in conjunction with the HDC (Hill Descent Control) system to achieve smooth and precise vehicle speed control.

Tank turn

Turning radius as low as 4.785m

EXTERIOR

VHDL (Vertical and Horizontal Design Language) aesthetics, perfectly proportioned design and powerful body shape.

JETOUR light and shadow grille

- Radiate brilliance at rest, lights flowing in motion; Rhythm of personality, combining strength and softness

Hardcore style body

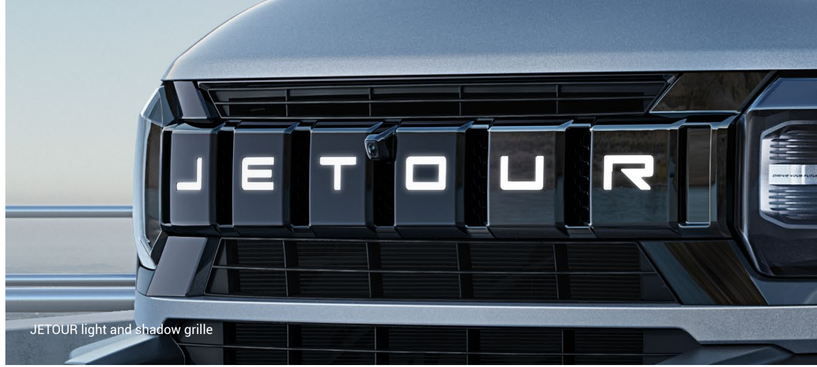

- Vertical and horizontal body lines and broad design in full aura; hardcore and powerful waist line
- Ultra large body size and ultra long wheelbase that balance comfortability and control

Matrix headlights

- The all-new LED headlights are arranged vertically and horizontally to create a multi-beam matrix. The headlights irradiation width reaches 38.1m while irradiation distance reaches 200m, meeting the needs of driving in rainy and foggy conditions

Streaming light-type taillights

- A luxurious combination of hardcore lines, like a crimson beam piercing through the night; eye-catching and stylish, with clear layers, compatible with various tough environments

Library-level quiet cabin

Concert hall-level surround cabin

50W mobile phone wireless fast charging

Premium Standard

Carefully selected materials, craftsmanship perfected to the highest standards, and striving for perfection in every detail, all to provide users with a better driving experience

Five-star health cabin

100+ kinds of environmentally friendly materials are selected to comprehensively improve antibacterial and odorless properties, and to achieve a baby-level health cabin experience

Library-level quiet cabin

Use multi-layered soundproof glass. Whether it is a conference call or a short nap, it is free from the noise of the outside world

Concert hall-level surround cabin

12-channel SONY top configuration and 360° stereo surround sound provide immersive and private experiences

50W mobile phone wireless fast charging

Instant charging, suitable for mobile phones of different models and sizes, charging efficiently without getting hot

Intelligent technology

People-oriented, using technology to empower every journey. Ultra-high intelligent configuration makes the trip full of fun and excitement.

Snapdragon 8155 Smart Chip

15.6-inch central control screen

540° panoramic image

Snapdragon 8155 Smart Chip

- 8-core automotive chip, using 7nm process with balanced power consumption and performance, capable of 8 trillion operations per second
- All-new UI/UE interface, smooth control
- Intelligent voice control in all scenarios, millisecond response

15.6-inch central control screen

- Over-sized screen
- The screen makes the touch operations more accurate, and enjoy watching blockbusters and videos

Colorful atmosphere lights

Colorful atmosphere, rhythm with your heart

Smart driving technology

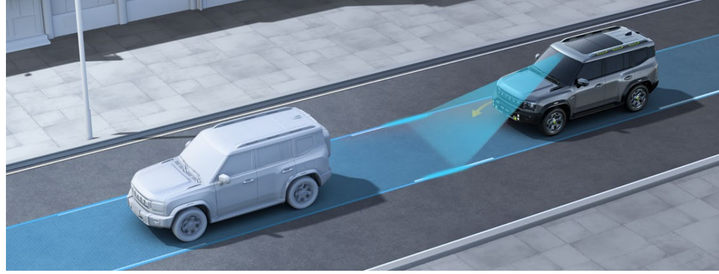

Driving with technology, more peaceful

L2 Intelligent driving assistance

Use wisdom to enhance your sense of security:
FCW forward collision warning system, LDW lane departure warning, BSD intelligent blind spot monitoring, DOW door opening warning system, RCTA rear cross collision warning system, AEB automatic braking system, TJA traffic jam driving assistance, LKA intelligent lane keeping assistance, ACC adaptive cruise and etc.

540° panoramic image

360° panoramic image + 180° transparent car bottom, comprehensive viewing angle, flexible to avoid various obstacles

Submarine-level body strength

Steel cage body structure

Arrayed high-density roof

Safety

Comprehensive protection to the fullest, ensuring that every passenger on board is always safe and secure at all times.

Submarine-level body strength

- 31000N·m/deg body torsional stiffness
- The car body deforms less when it is hit, making it safer
- The dynamic limit is higher and the body posture is more stable when driving

Steel cage body structure

High-strength steel accounts for up to 80%, and adopts integrated laser welding, which can effectively distribute the impact pressure evenly to the entire body to avoid secondary damage

Arrayed high-density roof

- Cross beams are densely arranged to effectively improve the bearing capacity and disperse the impact force
- The top pressure resistance reaches 147kN, ensuring the safety of personnel
- The roof can dynamically carry up to 150Kg to meet more storage needs

Travel+ Expansion

Space Expansion: Extensive interior and exterior space, fully equipped for camping living
Electric Power Expansion: Your Electric Camping Assistant, True Gaming Expert.

Storage space planned scientifically

There are up to 50+ storage spaces in the entire vehicle. Whether it is large items or small items, the items are reasonably classified and the space is ample in size. There is no need to rummage through boxes and cabinets, and there is no need to worry about making choices

Private camping room

Fold the second-row seats flat, and you can enjoy a king-sized bed. You do not need to set up a tent when camping, more constant temperature, more comfortable, and quieter. You can sleep in the scenery, and when you open the door, you can see the beautiful mountains and rivers

Enriching the travel eco-scenarios

Six major travel eco-scenarios, including desert off-roading, camping and stargazing, outdoor cycling, and lure fishing, comprehensively explore new ways of outdoor travelling

Magic Electric Tailgate

Ultra-high carrying capacity, accommodating tailgate modifications like small tabletops and other versatile setups, unlocking multi-scene applications such as creative workshops, adventurous kitchens, and on-the-go fashion shows

3.3kW vehicle to load

Capable of powering household appliances and kitchen gadgets such as microwaves, electric ovens, fans, lighting, and coffee machine, allowing users to enjoy camping more comfortably and freely

Parking cooler

Thanks to its ultra-high-energy battery pack, T2 i-DM maintains power supply even when parked or stationary. The air conditioning can operate independently without starting the engine. With 26.7kWh of battery energy, it ensures optimal temperature comfort for 24 hours, without any fuel consumption or engine wear. It's the perfect companion for camping.
